

## Get Square

### | CLINIC IN A BACKPACK |

#### PROBLEM

**In Nigeria, a large gap exists between the communities and healthcare system.**

- Clinics are not embedded in communities
- Communities are not educated about health care
- There is a lack of trust in the local health system

#### CONCEPT

**CareSquare will transform the way healthcare is delivered in developing nations.**

- Conducting mobile Immunization drives in communities
- Building trust by meeting people at their homes
- Educating about the importance of health care for children

#### PRODUCT

**CareSquare is a mobile clinic in a backpack.**

- A cool box that maintains vaccines for 24 hours
- Enough supplies to vaccinate 25-30 children
- A sharps disposal box and disposable waste box for medical waste
- A built-in workspace as well as an attached stool

#### IMPACT

**Concrete benefits are achieved by increasing vaccination rates in Nigeria from 60% (current) to 90%**

- 600,000 children's lives could be saved
- \$17 Billion in economic losses could be avoided
- The effects of several preventable diseases can be all but eliminated
